

Expert interview in the field of augmented reality: Requirements for Tracking Methods and Methods for Context Data Acquisition

Within the scope of my master thesis, I am researching the topic of augmented reality in the area of tracking methods and methods for context data acquisition. The goal is to develop a criteria catalogue for the implementation of different tracking and context data acquisition methods. These criteria catalogues are intended to relieve persons who are responsible for the decisions of the implementation of Augmented Reality in the industrial environment.

For this purpose, we are looking for experts in the field of augmented reality application development who:

Have at least 1 year of active experience in developing augmented reality applications and their tracking and contextual data collection requirements.

The interviews will be conducted online (by arrangement also on site in Karlsruhe) and will take about half an hour.

If you still have questions about the study or if I could spark your interest, please contact me at the following address: Maximilian.Pils@cas.de

With kind regards

B. Sc. Maximilian Pils
